### From The Expert

*Carl R. Thornfeldt, MD, FAAD  
Epionce Founder*

When I practiced dermatology, there was nothing more important to me than my patient's health – but listening to my patients was critical. I found myself thinking about the patient experience a lot. What could I do as their doctor to make their experiences with skin care better?

I believe our Enriched Firming Mask is part of that answer. It was designed to complement in-clinic treatments as a post-care product, calming the areas of the skin that are the most inflamed while recovering. It is integral to post-care healing, which is why it is part of the Essential Recovery Kit – an all-in-one patient take home kit clinically proven to enhance the results of treatment procedures. It gives relief and comfort to stressed skin when it's needed most.

Beyond post-care, the mask is multifunctional. It contains a proprietary blend of barrier lipids that optimize skin hydration and firmness, making it the perfect addition to your patient's weekly anti-aging skin care regimen. For even better results, I recommend leaving it on overnight for an extra surge of moisture.

## Epionce Enriched Firming Mask

*Intense Hydrating Mask Helps Calm and Soothe Stressed Skin*

This highly emollient mask uses signature Epionce botanicals and a proprietary blend of barrier lipids to enhance hydration, stop destructive inflammation and reduce redness in skin. Enriched Firming Mask is ideal for use following the Epionce Peel System to help calm and soothe sensitive skin post-procedure. It also enhances aesthetic results from in-office procedures when applied immediately after a chemical peel, IPL or laser treatment.

The mask is also ideal for at-home use on a regular basis to boost the results patients achieve with their daily Epionce regimen. The hydrating and calming mask can be applied one to two times per week to help minimize redness, encourage elasticity and firm the skin. It may be used on the face, hands and feet – or anywhere that requires extra hydration.

### Benefits of Enriched Firming Mask

- Calms, soothes and cools stressed skin post-procedure
- Quickly delivers maximum hydration and helps reduce redness
- Maximally stimulates skin's function with barrier lipids
- Firms and tightens skin by up-regulating acetylcholine
- Silky, elegant formula
- Suitable for all skin types
- Reveals a radiant, dewy glow
- Paraben-free, fragrance-free and non-comedogenic

# Enriched Firming Mask

## Enriched Firming Mask Boosts Results

The benefits of Enriched Firming Mask are most noticeable when used in conjunction with other Epionce products, like an Epionce cleanser and Renewal Facial product for skin type. Encourage patients to use their Epionce regimen consistently along with Enriched Firming Mask to boost results. Here are a few ways to incorporate it:

### Post-Procedure Care

Enriched Firming Mask helps maximize aesthetic results post-procedure. The multifunctional mask calms the heat and stinging after a chemical peel, microdermabrasion, micro-needling and laser procedures. For deeper treatments, leave Enriched Firming Mask on patient's skin post-procedure then apply a layer of Renewal Calming Cream (or Medical Barrier Cream) over the mask.

**Complementary Products: Milky Lotion Cleanser, Renewal Calming Cream and Priming Oil (Essential Recovery Kit)**

### Regimen for Dry, Flaky Skin

Dry skin – or dry skin caused by seasonal changes – can be avoided by adapting Enriched Firming Mask into your patient's regimen. Patients should use a Renewal Facial product for their skin type daily, and then apply the mask once or twice a week for additional hydration and to calm redness.

**Complementary Products: Balancing Toner, Intensive Nourishing Cream and Renewal Calming Cream**

### Regimen for Oily/Acne-Prone Skin

Even patients who suffer from acne lesions and oily skin will experience great benefits from Enriched Firming Mask. The anti-inflammatory properties of the mask help reduce redness caused by acne, and willow bark has comedolytic action to clean pores and minimize breakouts. Enriched Firming Mask is non-comedogenic and suitable for all skin types.

**Complementary Products: Purifying Wash, Purifying Spot Gel, Lytic Plus Tx**

## Regimen for Anti-Aging

With its collagen-enhancing and skin firming effect, Enriched Firming Mask boosts your patient's anti-aging regimen. Using the mask up to twice weekly will provide noticeably tighter, smoother skin texture.

**Complementary Products: Intense Defense Serum, Renewal Facial Cream and Luminous Eye Serum**

## Key Botanical Ingredients

### Meadowfoam Extract

- Optimizes skin firming and hydration
- Rich plant source of monounsaturated and omega-3 fatty acids
- Antioxidant and anti-inflammatory

### Willow Bark Extract

- Comedolytic to help clean pores
- Antimicrobial and anti-inflammatory

### Shea Butter

- Highly moisturizing and emollient
- Rich in vitamin A + E, which are known for anti-aging benefits
- Antimicrobial and anti-inflammatory

### Avocado Extract

- Promotes barrier repair
- Stimulates collagen + elastin production for tighter skin
- Antimicrobial and anti-inflammatory
